Dan-Victor Adesola

Frontend Developer | UI/UX DESIGNER

Driven Frontend Developer and designer with a strong track record in enhancing user experiences and interfaces through the expert application of HTML5, CSS3, JavaScript, and frameworks like React. Skilled in using TypeScript and Sass to write scalable and maintainable code, as well as in translating UI/UX designs from tools like Figma into responsive and interactive web applications. Proficient in working with APIs to build dynamic and data-driven interfaces, collaborating effectively with backend developers, and utilizing version control systems like Git. Recognized for exceptional debugging abilities, code optimization for faster load times, and a keen eye for design and functionality.
